

Co 52. *Pinus monophylla*
Mono Lake

These are all the numbers
that I am in possession of.

Yours
most sincerely
Bolander

S. F. 19th 68.

My dear Sir

Enclosed I send
you the desired names of the oaks
and pines as given by Dr. Engelmann.
6257 *Quercus lobata* - Mono mts to
6068 " " *Wislizeni* Engl. Bear Valley
6067 " " *sonoriensis* Benth. " "
6066 " " *Hillside* Coast Range
6066^a " " *lobata*
6066^b " " " "
6065^c " " *Wislizeni* Engl. Anderson Valley
6065^d " " " "
6065 " " " "
6064 " " " "
4823 " " " "
6062 " " " "

Very variable in foliage also sometimes
the cups of the acorns; but decided-
ly the same species.

- 6061 *Quercus lobata*
 6060 " " "
 6059 " " *Wislyeni* Engl. UMich
 6058 " " *agrifolia* Nees Cloverdale
 6057 " " *Pononiensis* Benth
 6055 " " *agrifolia*
 6056 " " *lobata* var. *Pambeliana* UMich
 4650 " " *Pononiensis* var.
 6054 " " *chrysolepis* Coast Range
 4835 " " *densiflora* Hook " "
 4779 " " " " "
 4891 " " *vacciniifolia* Kellogg

This last species seems to be distinct from *chrysolepis*, its cups are different and it is only met with as a shrub in high altitudes with *chrysolepis* in tree form. the blossoms sent to Dr. Engl. will probably decide, thus far I always found the empty cups only.

- 4534 *Taxus brevifolia* Nutt.
 Frost Hill
 6045. *Pinus flexilis* Torr.
 Mono Pass
 6051 " " *Lambertiana* Dougl. 8-9000
 Mount Remond.
 6053 *Abies Mortensiana* likely
 not different from *Canadensis*
 Dr. Engl. thinks there is no difference
 and Douglas calls the tree always
Canadensis in his memoirs, but it
 is nevertheless strange that those
 Maine log men never recognized it
 as such.
 6050 *Pinus monticola*
 Mount Remond 9000
 6049 " " *ponderosa* Big trees at
 Clark's
 6048 " " *contorta* Dougl.
 Yos. Valley Trail 8000
 6047 " " *ponderosa* Dougl.
 var. Mt. Remond 9000
